

Technical information

Easytemp TMR31, TMR35

Compact thermometer, Pt100, Class A

Optionally with integrated 4 to 20 mA transmitter, programmable via PC

Application

The Easytemp TMR31 and TMR35 compact thermometers are used to measure temperatures from -50 °C to 150 °C (-58 °F to 302 °F), or up to 200 °C (392 °F) with neck. The most common installation locations are tanks and pipes.

- TMR31 with process connections for general applications.
- TMR35 with process connections for hygienic applications.

Benefits at a glance

Quick installation and easy commissioning:

- Small, compact design made entirely of stainless steel
- M12 connector with IP69K for an easy electrical connection
- 4-wire, Pt100 or PC-programmable transmitter with 4 to 20 mA output
- Configuration and visualization with ReadWin 2000 PC operating software, which is free of charge
- Preset measuring range is available for order
- Variable insertion lengths from 40 mm to 600 mm (1.6 to 23.6 in)

Outstanding metrological properties thanks to innovative sensor technology:

- Extremely short response times
- Highly accurate even with short insertion lengths
- Thin film sensor element Pt100, accuracy class A (IEC 60751)

Safe operation with approvals and certificates:

- UL recognized component
- Meets all EMC requirements according to NAMUR NE21
- Breakdown information in event of sensor break or sensor short-circuit, adjustable as per NAMUR NE43
- TMR35: Hygienic compatible design with 3-A marking and EHEDG certification
- GL (Germanischer Lloyd) ship building approval

Function and system design

Measuring principle

Electronic recording and conversion of Pt100 input signals in industrial temperature measurement.

Measuring system

The compact thermometer uses a Pt100 (Class A) sensor element for measurement. The device is available with a Pt100 4-wire connection or, optionally, with an analog, temperature-linear 4 to 20 mA signal and can be programmed using a PC via the M12 connector. The compact thermometer has different process connections for general (TMR31) and hygienic applications (TMR35). The Easytemp TMR31, TMR35 has a new kind of thin film sensor element that is soldered directly into the sensor tip. This innovative sensor design ensures ideal heat transfer from the process to the sensor element. This means that extremely fast response times and high levels of accuracy can be achieved even with short insertion lengths.

Measuring point layout (example) for Easytemp compact thermometer TMR31 with additional Endress+Hauser components
Ecograph T, active barrier RN221 N and HAW562 surge arrester

Multi Channel Recorder Ecograph T

Multi-channel recorder Ecograph T in 144x144 mm (5.7 x 5.7 in) panel-mounted housing for the electronic detection, display, recording, analysis, remote transmission and archiving of analog and digital input signals. Data recording system on CompactFlash card, multi-colored LCD display, 120 mm (4.72 in) screen size. Configuration and measured value display via interfaces (USB, Ethernet, RS232/485) and ReadWin 2000 PC operating software.

Active barrier RN221 N

Active barrier with power supply for the safe separation of 4 to 20 mA standard signal circuits with optional intrinsically safe input. The current applied by the transmitter of the compact thermometer in the input circuit (4 to 20 mA) is transmitted linearly to the output.

Surge arrester HAW562

Protects consumer installations or measuring devices as well as signal lines and components against overvoltage which is induced by lightning striking in the distance or through switching operations. The HAW562 module acts as an overvoltage protection system in terminal block systems to protect signal lines and components and is installed on a module carrier (HAW560).

Input

Measuring principle	Temperature (temperature-linear transmission behavior)		
Measuring range	Designation	Measuring range limits	Min. span
	Pt100 as per IEC 60751	-50 to 150 °C (-58 to 302 °F) without neck -50 to 200 °C (-58 to 392 °F) with neck	10 K (18 °F)

Output

Output signal	<ul style="list-style-type: none">Standard: Pt100, Class A, 4-wireOptional: 4 to 20 mA or 20 to 4 mA
Signal on alarm	Signal on alarm as per NAMUR NE43 <ul style="list-style-type: none">Underranging: Linear drop to 3.8 mAOverranging: Linear rise to 20.5 mASensor break; sensor short-circuit: ≤ 3.6 mA or ≥ 21.0 mA (at settings ≥ 21.0 mA, 21.5 mA output is guaranteed)
Maximum load	$(U_{\text{power supply}} - 10 \text{ V}) / 0.023 \text{ A}$ (current output)
Min. current consumption	≤ 3.5 mA
Current limit	≤ 23 mA
Switch-on delay	2 s

Power supply

Electrical connection cables must comply with 3-A sanitary standard, must be smooth, corrosion resistant and cleanable.

Electrical connection

A: with electronics, M12 plug, 4-pin
Pin 1: power supply 10 to 35 V DC; current output 4 to 20 mA (cable connection, wire color brown = BN)
Pin 2: connection of PC configuration cable - shortened pin (cable connection, wire color white = WH)
Pin 3: power supply 0 V DC; current output 4 to 20 mA (cable connection, wire color blue = BU)
Pin 4: connection of PC configuration cable - shortened pin (cable connection, wire color black = BK)

B: without electronics, Pt100, 4-wire connection

Supply voltage	$U_b = 10 \text{ to } 35 \text{ V DC}$
----------------	--

Residual ripple Permitted residual ripple $U_{ss} \leq 3 \text{ V}$ at $U_b \geq 13 \text{ V}$, $f_{\max.} = 1 \text{ kHz}$

Performance characteristics

Response time $\leq 3 \text{ s}$ with transmitter

Reference operating conditions

- Matching temperature (ice bath) $0 \text{ }^{\circ}\text{C}$ ($32 \text{ }^{\circ}\text{F}$) for Pt100 sensor
- Ambient temperature $25 \text{ }^{\circ}\text{C} \pm 5 \text{ }^{\circ}\text{C}$ ($77 \text{ }^{\circ}\text{F} \pm 9 \text{ }^{\circ}\text{F}$) for transmitter

Maximum measured error **Electronics**
 0.1 K ($0.18 \text{ }^{\circ}\text{F}$) or 0.08% . % relates to the set span. The larger value applies.

Sensor (Pt100) for version without transmitter

- Tolerance class A as per IEC 60751, operating temperature range -50 to $200 \text{ }^{\circ}\text{C}$ (-58 to $392 \text{ }^{\circ}\text{F}$) with neck
- Maximum measured error in $^{\circ}\text{C} = 0.15 + 0.002 \cdot |T|$
 $|T|$ = Numerical value of the temperature in $^{\circ}\text{C}$ without regard to the leading sign.

Total deviation of electronics + sensor

- Operating temperature range:
 -50 to $150 \text{ }^{\circ}\text{C}$ (-58 to $302 \text{ }^{\circ}\text{F}$) without neck
 -50 to $200 \text{ }^{\circ}\text{C}$ (-58 to $392 \text{ }^{\circ}\text{F}$) with neck
- $0.25 \text{ K} + 0.002 \cdot |T|$

Long-term stability of electronics $\leq 0.1 \text{ K}$ ($0.18 \text{ }^{\circ}\text{F}$)/year or $\leq 0.05\%$ /year
 Data under reference conditions. % relates to the set span. The larger value applies.

Influence of ambient temperature (temperature drift)

- Pt100 resistance thermometer:
 $T_d = \pm(15 \text{ ppm/K} \cdot (\text{full scale value of measuring range} + 200) + 50 \text{ ppm/K} \cdot \text{set measuring range}) \cdot \Delta \vartheta$
 $\Delta \vartheta$ = deviation of ambient temperature from the reference operating condition.

Influence of load $\pm 0.02\%/100 \Omega$
 Specifications refer to the full scale value of the measuring range.

Transmitter response time 1 s

Sensor response time Measured as per IEC 60751, in water flowing at 0.4 m/s (1.3 ft/s)

t_{50}	t_{90}
$< 1.0 \text{ s}$	$< 2.0 \text{ s}$

Influence of supply voltage $\leq \pm 0.01\%/V$ deviation from 24 V
 Specifications in percent refer to the full scale value of the measuring range.

Self-heating Negligible small

Sensor current $\leq 0.6 \text{ mA}$

Installation conditions

Orientation No restrictions, but self draining. If applicable leak detection hole must be at the lowest point.

Installation instructions **Mounting location**
The insertion length of the compact thermometer can have a substantial influence on the accuracy. If the insertion length is insufficient, heat dissipation via the process connection and the container wall can cause measurement errors. To minimize errors caused by heat dissipation, a minimum insertion length of $L_{min} = 40\text{ mm}$ (1.6 in) is recommended.

- | | |
|------------------------------|-------------------------------|
| TMR31 - general applications | TMR35 - hygienic applications |
|------------------------------|-------------------------------|
- Pipe installation of the compact thermometer:
- A: On angle brackets
 - B: In smaller pipes, inclined
 - C: Perpendicular to the direction of flow, TMR35 with minimal 3° inclination because of self draining
 - L = Insertion length

- Mounting instructions for installation in various hygienic processes*
- | | |
|---|---|
| 1 | Milk pipe connection as per DIN 11851 only in linkage EHEDG certified and self centering ring |
| 2 | Varivent® - process connection |
| 3 | Clamp as per ISO 2852 |
| 4 | Liquiphant-M G1" process connection, horizontal installation |

The matches for the process connections as well as the gaskets are not included in the scope of delivery of this assembly. Welding adapter for process connections with associated O-ring sets are available as accessories, → 14.

Care should be taken by the user in the execution of the welding on the process side:

- Suitable weld material.
- Flush welding or with welding radius > 3.2 mm.
- Absence of pits, folds, crevices.
- Ground and polished surface ($R_a \leq 0.8 \mu\text{m}$).

As a general rule, the thermometers should be installed in such a way that does not adversely affect their cleanability (3-A requirements must be adhered to). The required flush-mounting can be achieved by the connection Varivent®, Liquiphant (+ weld-in adapter).

Environment conditions

Process conditions

Process temperature limits The electronics of the TMR31 and TMR35 must be protected from temperatures above 85 °C (185 °F) by a neck of appropriate length. TMR31 and TMR35 compact thermometers without electronics (Pt100, 4-wire) do not require a neck.

- -50 to 150 °C (-58 to 302 °F) without neck
- -50 to 200 °C (-58 to 392 °F) with neck
- -50 to 200 °C (-58 to 392 °F) without electronics

Restrictions depending on process connection and ambient temperature:

- For installation with adjustable insertion length (welding boss with sealing taper, Order No. **51004751**; collar welding boss Order No. **51004752**; compression fitting with sealing taper, Order No. **51004753**) provide a neck with an appropriate length.

■ For TMR31 with process connection:

Max. ambient temperature	Max. process temperature	
	Without neck	With neck 35 mm (1.38 in)
Up to 25 °C (77 °F)	150 °C (302 °F)	200 °C (392 °F)
Up to 40 °C (104 °F)	135 °C (275 °F)	180 °C (356 °F)
Up to 60 °C (140 °F)	120 °C (248 °F)	160 °C (320 °F)
Up to 85 °C (185 °F)	100 °C (212 °F)	133 °C (271 °F)

Process pressure limits Maximum permitted process pressure depending on the insertion length. It is limited further by the process connection in question. Follow the designs of process connection in section "Mechanical construction" and section "Accessories".

Maximum permitted process pressure
L Insertion length
p Process pressure

The diagram takes into consideration not only the overpressure but also the pressure load caused by the flow, whereby a safety factor of 1.9 has been specified for operation with flow. The maximum permitted static operating pressure is lower at greater insertion lengths due to the increased bending load caused by the flow. The calculation assumes the maximum permitted medium velocity for the respective insertion length (see diagram below).

Permitted flow velocity depending on the insertion length

Permitted flow velocity

L Insertion length, during flow

v Flow velocity

A Medium water at $T = 50\text{ °C}$ (122 °F)

B Medium superheated steam at $T = 200\text{ °C}$ (392 °F)

The permitted flow velocity is the minimum from resonance velocity (resonance distance 80%) and load or buckling caused by flow, which would lead to failure of the thermometer tube or to exceedance of the safety factor (1.9). Calculation was performed for the specified limit operating conditions of 200 °C (392 °F) and $\leq \text{bar}$ (1450 psi) process pressure.

Ordering information

Detailed ordering information is available from the following sources:

- In the Product Configurator on the Endress+Hauser website:
www.endress.com → Select your country → Products → Select measuring technology, software or components → Select the product (picklists: measurement method, product family etc.) → Device support (right-hand column): Configure the selected product → The Product Configurator for the selected product opens.
- From your Endress+Hauser Sales Center:
www.addresses.endress.com

Product Configurator - the tool for individual product configuration:

- Up-to-the-minute configuration data
- Depending on the device: Direct input of measuring point-specific information such as measuring range or operating language
- Automatic verification of exclusion criteria
- Automatic creation of the order code and its breakdown in PDF or Excel output format
- Ability to order directly in the Endress+Hauser Online Shop

Accessories

Various accessories, which can be ordered with the device or subsequently from Endress+Hauser, are available for the device. Detailed information on the order code in question is available from your local Endress+Hauser sales center or on the product page of the Endress+Hauser website:
www.endress.com.

	Material: Silicone, VMQ23-70, FDA, USP Class VI	71086102 (3 pieces)

Weld-in pipe + thermowell TT411

Coupling

Coupling M12x1 for simple user installable assembly of the connecting cable; elbowed; connection to M12x1 housing connector IP67, PG7
Order number: 51006327

A0020722

Connecting cable (pre-assembled)

PVC cable, 4 x 0.34 mm² (22 AWG) with M12x1 coupling; elbowed; screw plug; length 5 m (16.4 ft); IP67
Order number: 51005148
Core colours:
- 1 = BN brown
- 2 = WH white
- 3 = BU blue
- 4 = BK black

A0020723

Cordset

PVC cable, 4 x 0.34 mm² (22 AWG) with M12x1 coupling nut from stainless steel; straight female connector type; screw plug; length 5 m (16.4 ft); IP69K
Order number: 71217708
Core colours:
- 1 = BN brown
- 2 = WH white
- 3 = BU blue
- 4 = BK black

A0020725

Configuration kit

- Configuration kit for PC-programmable transmitters - ReadWin 2000 setup program and interface cable (4 pin plug) for PCs with USB port; with adapter for compact thermometers with M12x1 thread; Order code: TXU10-BA
- ReadWin 2000 can be downloaded free of charge directly from the internet at the following address: www.endress.com/readwin

A0028635

Service-specific accessories

Accessories	Description
Applicator	<p>Software for selecting and sizing Endress+Hauser measuring devices:</p> <ul style="list-style-type: none"> ■ Calculation of all the necessary data for identifying the optimum measuring device: e.g. pressure loss, accuracy or process connections. ■ Graphic illustration of the calculation results <p>Administration, documentation and access to all project-related data and parameters over the entire life cycle of a project.</p> <p>Applicator is available:</p> <ul style="list-style-type: none"> ■ Via the Internet: https://wapps.endress.com/applicator ■ On CD-ROM for local PC installation.
Konfigurator ^{+temperature}	<p>Software for selecting and configuring the product depending on the measuring task, supported by graphics. Includes a comprehensive knowledge database and calculation tools:</p> <ul style="list-style-type: none"> ■ For temperature competence ■ Quick and easy design and sizing of temperature measuring points ■ Ideal measuring point design and sizing to suit the processes and needs of a wide range of industries <p>The Konfigurator is available: On request from your Endress+Hauser sales office on a CD-ROM for local PC installation.</p>
W@M	<p>Life cycle management for your plant W@M supports you with a wide range of software applications over the entire process: from planning and procurement, to the installation, commissioning and operation of the measuring devices. All the relevant device information, such as the device status, spare parts and device-specific documentation, is available for every device over the entire life cycle. The application already contains the data of your Endress+Hauser device. Endress+Hauser also takes care of maintaining and updating the data records.</p> <p>W@M is available:</p> <ul style="list-style-type: none"> ■ Via the Internet: www.endress.com/lifecyclemanagement ■ On CD-ROM for local PC installation.
FieldCare	<p>FDT-based plant asset management tool from Endress+Hauser. It can configure all smart field units in your system and helps you manage them. By using the status information, it is also a simple but effective way of checking their status and condition.</p> <p> For details: see Operating Instructions BA00027S and BA00059S</p>

System components

Accessories	Description
Field display unit RIA16	<p>The display unit records the analog measuring signal from the head transmitter and shows this on the display. The LC display shows the current measured value in digital form and as a bar graph indicating a limit value violation. The display unit is looped into the 4 to 20 mA circuit and gets the required energy from there.</p> <p> For details: see the Technical Information document TI00144R/09/en</p>
Field indicator RIA15	<p>Loop-powered field indicator for 4 to 20 mA circuit, panel mounting.</p> <p> For details: see the Technical Information document TI01043K/09/en</p>

RN221N	<div>Active barrier with power supply for safe separation of 4 to 20 mA standard signal circuits. Offers bidirectional HART® transmission.</div> <div> For details: see the Technical Information document TI0073R and Operating Instructions BA00202R</div>
RNS221	<div>Supply unit for powering two 2-wire measuring devices solely in the non-Ex area. Bidirectional communication is possible via the HART® communication jacks.</div> <div> For details: see the Technical Information document TI0081R and Brief Operating Instructions KA00110R</div>
